

CHAPTER 16

VA, Hillary Clinton and Kenneth Kizer

~OR~

VA's 5 Year Golden Era

'A lie is a lie even when everyone believes it; truth remains truth even when nobody believes it. Adolf Hitler.

A pervasive lie that veterans get healthcare and benefits on par or better than private sector is now a commonly believed, persistent, propagandized lie. Here are the historical facts – you figure out the rest. During the Clinton Administration, first lady, Hillary Clinton's plan was to sell America on Socialized Healthcare. She needed a sterling Socialized example so chose the VA as her model. Armed with a presidential decree she gave VA an ultimatum: *reform into that sterling model **or else***. Hillary Clinton needs no introduction: she has sharp teeth and a very nasty bite. In 1994, Clinton put Kenneth Kizer in charge of the VA healthcare system, as Undersecretary of Veterans Affairs. The new sheriff over that agency had large teeth and nasty bite, too. Kizer among his many accomplishments, reformed VA; he modernized the VA's computer systems, fired poor-performing doctors and support staff, then established private-sector-style metrics to measure the VA's performance on things like patient wait times, care quality, service, etc. In other words, during his five-year tenure Kizer reformed VA into a working top performing healthcare and benefits institution notwithstanding entrenched, status quo 'good old boy and girl' interests dead set against him derailing their gravy trains. **He & Hillary created a long overdue 'good 'ol boy and girl' mammoth gravy train wreck into quality Veteran healthcare providing veterans the benefits they earned & deserved for the very first time in VA history.** Together they reformed VA healthcare and benefits into a crown jewel of what quality healthcare can be and a highly envied example by the private US medical industry. Moreover, they did it without additional laws, legislation and without increasing VA budgets from Washington DC. **Hillary is a lot of things but she and Kizer did what The Ship of Fools US Congress and all their cronies could not and still cannot do: true VA reform making that a first in the history of Dept of Veterans Affairs, and that agency cannot take one whit of credit for those historical accomplishments!** However, all good things end; after Clinton left office and Kizer resigned from VA 5 years later so did their success story. Recidivism quickly reclaimed the institution to its former shithole

disaster run by status quo 'good old boy and girl' special interests: VA, VSO's, Congressional political pork, AFGE union, misc crony's, internal corruption, etc. They restarted their gravy trains robbing veterans to pay for their free ride and lunch. All the while, plagiarizing & stealing credit, hiding behind claimed and published accounts that it never accomplished from undertakings during the Clinton & Kizer 5 year VA golden age. **VA is now considered the worst healthcare system in America yet perpetuates commonly believed ancient lies to the contrary.** Ref credit: Avik Roy, Forbes Staff writer.

CHAPTER 17

**Contacting VA for help may be the last thing
you ever do alive or on two legs.**

~OR~

You will be sorry.

*Veterans undergo the aforementioned and much worse. As a waiting room mouse, I have observed and heard their shocking stories; however, those are their stories. This narrative is mine, up close and personal during the more than 36 months of undergoing VA hell-care! Worse off are Vets, especially MHC patients, offloaded to 'VA Crisis-helpless' line as liability victims. The whole reason for that Crisis Line is to send onus for a troubled vet somewhere else so that should something go wrong, as it invariably will, VA can blame the vendor and veteran. The agency has clean hands and their vendor owns criminal & malpractice lawsuits. **Dead veterans tell no tales.** Vendors know this and will call in civilian authorities to offload a perceived 'dangerous' veteran to them then disown all liability! Too many documented cases of this exist! Mention a 'gun' ***beep*** dangerous vet alert; mention or even hints of violence especially with a firearm ***beep, beep!*** extremely dangerous vet. Even an angry voice tone will launch the Gestapo SWAT teams to neutralize another terrorist threat. Homeland security classifies veterans as terrorist threats. When one is drugged, despondent, confused & angry, maybe having combat flashbacks, is suicidal and/or out of his or her head often the person has no idea what s/he is saying! **But these hysterical, chicken little, halfwits***

overreact and call in swat team strike forces on him like a WW3 attack. Veterans are meeting a deadly end just for seeking help from the VA that it constantly preaches in our faces! Instead of helping a sick and troubled veteran the authorities cover up their hysterical overreaction as neutralizing another terrorist threat. Homeland security considers vets as terrorist threats aiding in the cover ups and lies; stupid Americans are as clueless about the word 'terrorists' as they were about the 'cold war' believing what the talking heads on the TV parrot: 'Winnie the Pooh' is this weeks star bad boy terrorist poster child. But stay tuned because next week it is badass Howdy Doodle's turn. The following statements spearhead this point well:

- *When feeling helpless and overwhelmed, seeking psychiatric treatment anywhere can turn into the most dangerous mistake of a person's life. People often avoid seeking help for fear of being locked up and/or forced to take drugs, when voluntary psychotherapeutic interventions can be lifesaving. Psychiatry's capacity to force treatment upon its most challenging patients means that psychiatrists have little motivation to develop genuinely helpful treatments. Psychiatrists can and do get away with compulsively repeating the same old oppressive approaches—hospitalization, mind-numbing drugs, and ECT—without any evidence for their effectiveness. Peter Breggin, MD*
- *I saw a VA psychologist for over a year who offered exposure therapy to ease my symptoms, but ultimately made them far worse, to the point I became suicidal. I felt confident enough to tell him that it wasn't working and he responded with, "You know I am doing you a favor by seeing you." ...getting in touch with your doctor through the VA is like killing yourself—so it's a lose-lose situation. Kat Kaelin The Havok Journal February 28, 2019.*
- *The last thing a troubled person on the edge seeking help expects is keystone cops swat team swarming and storming their house like a terrorist nest in Beirut. That does so much unnecessary deadly harm in what amounts to Veterans Affairs clearing out an ant infestation with a bulldozer. That is government run VA healthcare. It is the veteran seeking help that meets the worst of it. S/he is terrorized into never seeking help again or killed by an over reactive swat team eliminating a VA mistake. VA walks away clean, which is the whole point.*

- What is so hard about the VA clinic or call center coordinating and asking a suicidal veteran to come in for an emergency appointment with a private or VA therapist? Instead of calling out the marines on s/he? The call is for help; but VA and its call centers respond as if it is a major WW3 military attack and kill the patient to cover up Socialist VA employee incompetence and fear of being held responsible for his or her actions.

US veterans, are a hot liability potato tossed from person & agency to the next one until it all finally crashes down to s/he taking the often deadly fall when seeking help from VA. It is always someone else's fault never Socialized medicine. Any veteran better realize that s/he faces probability of meeting one or more of the above scenarios or worse when contacting VA or its agents for MHC help, and that is only the beginning. Heaven help you my friends should you manage to get into their mistreatment dungeons of drugged torture to self-murder by their terroristically, sadistic staff of MHC providers. US Dept of Veterans Affairs is 100% responsible for all on campus veteran suicides, and 99-9/10% for veteran deaths elsewhere.

CHAPTER 18

Deadbeat VA veteran dumping grounds

~OR~

Love Canal pales in contrast to VA Toxic waste dumping.

Another vet dumping ground is private healthcare 'free' MHC services and dark horse pseudo-voucher systems known as VetChoice or Mission Act. Vendors hired under the government 3-bid system: take three bids and choose the sorriest crony giving you the biggest under the table kickback for a juicy govt contract. VA does this for two reasons, to shift all liability elsewhere, to a vendor in this case while offloading patient load and keeping the MHC budget-\$\$\$ in VA hands. Medical care is iffy and Vets using these quacks who accept VA programs at all are stuck paying the costs when VA refuses to do so. Why? Because all unused money returns to VA general revenues paying bonuses, perks and more to its executives, employees and Congressional political pork troughs, etc. Majorities of civilian doctors refuse VA pseudo-voucher reimbursements because deadbeat VA does not pay its bills. Moreover, pursuing

robbed Vets who cannot pay but are stuck with those unpaid debts is too costly and time consuming, which is why VetChoice and Mission acts failed: VA sabotages them to keep those 'budgets' in their system for misappropriation into their offshore, Swiss bank accounts. Because of aforewritten, Vet participation is low and VA propagandizes that into 'Vets love VA and do not want choice outside of it.' All the cobble that Vets do not want true choice is propaganda by VSO's, VA, AFGE union officials, Civil Service employees, politicians and more whose gravy trains will derail into train wrecks when total privatization goes live and real!!! Very powerful political interests that have been in control of the agency for over a century fight against anything limiting VA pork, especially a true voucher system or total privatization of Vet healthcare and benefit systems! Nonetheless, those Vets who do use pseudo-voucher programs, pay the bills through debt collectors that show up many months to over a year later demanding settlement of delinquent VA medical debts, which is first notice to a patient that VA did not do so! Vendors are frustrated and angry after wasting so much time chasing denied claims. The Veteran not 'deadbeat government' is punished. BTW, BIA does the same things to Native Americans confined on US concentration camps aka Reservations. I.e., over 60% of the natives living on Pine Ridge Reservation do not have running water or electricity, they barely survive at bottom the poverty line and receive very little after budgeted funds are purloined before getting to them. Only fifty cents out of every five dollars actually gets to veterans; the other \$4.50 disappears in the same manner as BIA. VA and BIA....only in Nazi Amerika.

CHAPTER 19

Veterans want free choices without VA oversight.

~OR~

Ditto!

VA billing is very good at –robbing – private Insurance and taxpayers – but no bueno at paying debts from their full pockets of purloined cash.

*However, **VetChoice proved one very stark point: Veterans want true choice of where and from whom they get their medical care and it is not from an existing Socialist government, single payer VA, HMO that cripples and kills them.** Our protectors and watch dog groups – the politicians, AFGE unions, VSO, OIG and other Vet support agencies, VA kangaroo judicial systems, etc – spend resources on political self-interest, self-promotion, empire building and watching their food dishes while keeping Veterans controlled, divided, robbed and conquered against ever getting what we truly need. Only VA, its cronies, and America could sink so low in sewage filth profiteering from veteran suffering and suicide.* However, powerful outside interests have noticed the 400 billion dollar low hanging fruit ripe for the picking. All they have to do is woo **the reason** that VA exists at all away to get it. Private healthcare choice Interests like everyone else uses want the ever-increasing **400 billion dollar ‘WASTED’ annual VA budget and the veterans** reallocated into the private sector, and are diligently working to make that happen. Real veteran healthcare freedom of choice minus VA interference fuels current privatization battles on Capitol Hill: **return purloined taxpayer resources to the economy that paid them while giving veterans freedom to choose first rate healthcare without Socialist government interference for the very first time in US history!** To do so means wooing the very small percentage of people who actually use VA into private sector. Without them the agency has no purpose to exist: result – **sunset, extinction and good riddance.** **There is life beyond VA and a majority of Veterans, over 92% and growing who have never used VA say that private care works and socialist systems do not.** **What mass media never mentions in news bias about thousands of men and women dying in the Veteran suicide epidemic, murdered in VA hospitals, dying while on lists waiting for care and such are the tens of millions more who are surviving either by never stepping foot in or self-privatizing away from and out of that government medical system - as I currently have and did for over 40 years.** VA *claims* that it cannot figure out why we do not enter or why we are leaving? I will tell the why - **When an institution makes it hard and of no benefit to use or to remain in it, people do not!** Customer service and quality supports or destroys those services, which is not rocket science except to govt run, tax supported monopolies! How simple can that be? However, VA simply cannot accept that simplicity into its reality...must be something wrong with them and their Socialist system. **The lesson is a horrible warning against government run Socialized medicine or anything in this country.** Something must be done about broken US private medical industry, *make no mistake about that. All insurance funded Capitalist medicine is Socialized somewhat but is in no way as disastrous as the VA model!!* VetChoice and Mission Act SNAFU's illustrate that fact! **92% of all self-privatized Veterans who do not use VA at all are right: private healthcare works while Socialist government health benefits systems FAIL terribly!**

CHAPTER 20

Only Insured, Fat Cash Cow Vets Do VA Trust.

~OR~

Broke Dick, Veteran Bums, Go Away

The unpublished but now officially confirmed report that during Obama's Phoenix VA scandals over 300,000 veterans died while languishing on secret waiting lists for care did not mention an interesting reason why: **they were uninsured!** Ex-military and 'non-Vet' dependents who have private health insurance to pay get priority medical treatment in VA facilities over uninsured Vets. VA is an organized racket! Those who pay for medical services with insurance, etc. generate additional revenues for profitable training hospitals and clinics in addition to what taxpayers already fund. **That is rationed VA Socialist healthcare!** People who can pay go ahead of the charity cases. Money talks while broke vets - 300,000 - of them waited, suffered and died. VA is a government run HMO. Taxpayers fund the *charity cases* via 'capitation payments' paid by GAO whether treated or not! Money for nothing. Until GAO stopped the practice, VA was using ghost lists of long dead Veterans to pad billing! Probably the same list of dead voters that elected Obama? Furthermore, it runs a for profit medical operation at taxpayer expense, while making more money using ex-military as trapped, expendable, human *lab monkeys* in its clinics, research & training hospitals educating physicians, nurses and med techs, etc. overcoming medical ignorance well enough to avoid malpractice suits when practicing medicine on civilians. Much like cutting up pickled frogs in high school biology class teaching students anatomy. Thank you for your service, frog. Until recently, their doctors were immune from malpractice and similar patient redress as civilian doctors face under civil tort laws. Such immunity allowed them to do anything to a patient with impunity, much like Nazi Dr. death Mengele and his cohorts. However all that is changing as evidenced by wrongful death lawsuits generated from Veteran suicides now amounting to over two billion dollars and climbing. Suing VA *doctors or staff*, is gaining ground in due process tort law courts outside of VA's kangaroo judicial system. It is there their virgin-malpractice-immunity is lost. Courts are beginning to imprison these employees for criminal negligence, malfeasance, and murder. On the other hand, it is easier to sue a VA doctor than receive C&P

disability rating. Hopefully that will change soon when the agency is replaced by something better. From front door kiosks to the janitor's closet and every appointment related document asks for and demands that patients: **bring all your health insurance cards and information – it is the law! Right on Judge Dredd.**

You Have An Appointment

Department of Veterans Affairs
Fort Worth Outpatient Clinic

Can't make it?
Please call
817-730-0000
to cancel.
A fellow veteran
can have this time
slot if you call to
cancel at least
24 hours ahead.

Your appointment details:
Date: Friday, Jan 31, 2020
Time: .

Please bring all your health insurance cards.

Please bring your insurance information and check in with
clerk or on clinic kiosk 30 minutes before your appointment.
If you have lab orders, please report to the lab up to 2
weeks prior to seeing the provider who ordered the labs.
Unless advised by your provider, you no longer need to
fast for labs. However, if you fast, please take all
your medications, EXCEPT for any diabetes drugs.

**FLU SHOTS ARE HERE STAY
HEALTHY AVOID THE RISK OF
THE FLU GET PROTECTED** Get
protected during your next visit at
the North Texas Health Care
System.

Have a question?
Call (800) 443-9672
We look forward to seeing you!

A Vision 1.0

The institution very aggressively pursues this! ‘**It is the law,**’ and the noble, patriotic thing to do blares 90 second self-righteous VA – TV messages throughout facilities and waiting rooms. Following the law returns to VA all that it selflessly does serving you [lucky] Vets... Tax supported VA very insistently, rations its services first to insured Vets and insured dependents over uninsured patients. Charging and billing private insurance, same as private sector clinics or hospitals do in providing taxpayer supported government medical services, which *in many cases does little more than generate billable revenue*. VA clinic and hospital waiting rooms filled with people waiting for double and triple booked appointments never realize why s/he waits all day while providers see other patients first who came after them. The reason? Because they are paying and money gets to see the provider while no money sits all day waiting for a turn. Still sitting there at end of day? Reschedule for the next triple booked opening. Insured patients must be seen on time while uninsured ‘charity cases’ remain on standby...waiting, waiting...dying. Much like they do at airports when waiting on standby for the next flight home...wait, wait, wait, ZZZZZZZZ. VA knows very well that if it kept paying customers waiting they would leave and take their health insurance dollars to the evil private sector only to realize how bad VA really was and s/he has been getting robbed!!! Creative practitioners definitely pad bills in many ways! One is to schedule clinical appointments for training and billing purposes! A nurse or even someone who looks like a nurse – it could be a janitor for all I know - appointment goes like this: during interview, s/he asks standard VA questions, reviews a patient’s chart then sends s/he home. Totally useless except to

train new nurses and bill my insurance 165.00 dollars. Another is too many unnecessary billable procedures such a Lab work. **In other words, a US government, taxpayer supported system draining private resources out of free market healthcare industry that does not have taxpayer subsidy support. A racket that certainly is not competitive, fair or just! Don't even get me started about third world healthcare quality. Why is not every private doctor, nurse, administrator, and medical facility in US not protesting this resource misappropriation?!** *A seasoned veteran called me a 'fool' for giving VA my health insurance information and left it at that. Now I know why and agree with him...seems no good, ethical deed goes unpunished when dealing with VA and US government. Lesson well taught...fool that I am, fool that I have been but only once assholes.*

Here is the million dollar question, if Socialist, government run, single payer systems like VA are so great why does it insist that Vets and non-Vets pay for government provided medical services using private health insurance such as Medigap, Tricare or other?

For instance, in one month VA billing charged my insurance over twenty thousand dollars in unnecessary tests ordered because of complaints I made about negative side effects from the drugs they prescribed. VA staff providers over medicate veterans for a reason!! For one thing they get a commission for each Rx issued. Moreover, the pill bottles state **"May only be refilled at a VA pharmacy."** Taxpayer supported VA is competing with private pharmacies too! In one case, when I complained to the doctor about cardiac symptoms inherent to a drug she prescribed, her response was to say, "all drugs have side effects" increase the dosage 50%, order expensive cardiology tests, and refer me to the cardiac clinic! **I did not and do not have heart problems; all heart disease symptoms and problems were drug induced, arising from the first dose and vanishing shortly after I stopped using the medicine. Increasing the dosage 50% only made side effects worse!** However, had I cooperated with Ms. MD, I surely would have had heart problems after she was finished. After tens of thousands in dollars of unneeded tests, a butt-load of misery from prescribed drug side effects, it finally occurred to me what this MD and her cronies were doing in the hidebound resistance against changing troublesome medicines about which I complained.

Cardiology for CASH treatment is one of the most financially lucrative areas of Western medicine! The drugs were working by keeping me dazed and confused while creating patient complaints that resulted in justifiably ordering

unneeded tests and procedures in which to bill medical insurance for treatment revenue, while creating another heart patient for Baylor Butcher medical students & doctors to practice chopping on in VA training hospitals. They already run dialysis for DOLLARS and suicide for profit rackets and tried to push me there, too. Had I cooperated, they would have chopped on and treated me until Insurance ran out unless I first expired. Then, since I am a body and organ donor, these bastards would have parted out the body like an old car and sold every piece, profiting to the last organ, bit of bone and flesh.

The Movie ‘Coma’ immediately came to mind and I was another star corpse! Feet do not fail me now! Get my ass outta here - quick! Remember what I wrote earlier? That it only takes once for a final trip wearing only a toe tag and blanket to the basement morgue....I was lucky.

I have requested ten times that the drug causing cardiac symptoms be added to my pharmacy records as ‘known reported negative cardiac side effects’ and VA refuses to do that! Proving their aforementioned intent was to use me as a cardiac lab monkey for training heart surgeons. *I guarantee, VA staff is doing this same thing to other unsuspecting veterans.* If it is happening to me then other people have gone down this road too! I told my civilian doctor only once to include this drug and more in my records and it is there. I then reported the aforewritten to FDA to document. Folks, the reason we encounter these horrors is because all the cowards before us did not stand up to the abuse!! Therefore, everyone who does not stand up to them is training VA to abuse them and other vets as well! Alexander Solzhenitsyn wrote in his Gulag Archipelago that when the ‘Orgs aka Gestapo’ came after their next targets in midnight raids those who fought back often with nothing more than a teaspoon were released unharmed. The cowards met the most torture!!! *Now I realize the proper care and feeding of hospitals and doctors is very expensive. To do that they must pull people back from the brink of death, but to do that first they must send them there! Only this is ridiculous!!* Before I stopped what she was doing, unnecessary cardiac testing with intent to create and treat a non-existent problem was a lion’s share of the twenty thousand dollar charges to health insurance in a single month. Myriad, sundry labs and tests throughout the year from other clinic providers, *most of them unnecessary,* generated more massive profits into VA coffer. *Health insurance or too much of it is hazardous to one’s health and welfare!!! Now I know why the old Vet who knew how to game this system told me that I was a “FOOL” to pay VA with my health insurance!!*

Unfortunately, the Djinn are released. I walk this path of life per my values and did what was proper according to them. He does so per his mores. Perhaps he is

right; for, *it seems no ethical deed goes unpunished when dealing with VA & government.*

Yep, fool me once naughty you; fool me twice naughty me - but only once assholes!

CHAPTER 21

Word From the Street using Real Medical Private Care.

~OR~

Nearly all welfare employees nursing the VA sugar tit cannot get anything better?

Typical government employment: parasitic blood sucking bureaucrats who cannot get anything better live very well bleeding people's taxes. Quality VA recruitment suffers because of that stigma among other reasons. What I did not understand when at the civilian hospital was an 'insistent hint' made by six people there: "Do you really want to transfer out of here to a VA hospital?" My reply, "I do not have medical insurance; it was this or die; I chose to die, but it takes a lot of dying to kill a man and coming here was not my first choice. VA is paying the bill and if I do not cooperate it hands me the whole cost of a hospital visit I cannot afford." But for that, coming here was my first choice. Besides this country owns what is wrong with me as consequence of serving military duty with a gun barrel in the back. Moreover, it is overwhelming how many 'gotchas' that deadbeat institution uses to not pay its debts and punish Vets for going outside of it to private care! While in that civilian hospital, I talked to a couple of world-wise, well seasoned, nurses and doctors about VA. Their answers in sum were – if listed on a resume, working there is career suicide except at a clap clinic located over an ambulance chasing law firm on skid row. The nurses were very frank; the doctors were coy. Doctors are good at vagaries. One had to look through them to read between the lines for same brutally honest answers given by nurses straightaway. The nurses gained experience at VA as contract job shopper, temps brought in to shore up incompetent staff during OIG and other inspections when the agency needed to pass an audit. They were also brought in when it was necessary to offload liability. The Doctors did brief residencies as med school students and ran

screaming from that place when their 90 days ended. *The last thing said to me by attending physician on the day I transferred out of pvt hospital to VA regional was, "May heaven help you my friend." Then she left the room shaking her head in disgust. In hindsight I needed more than heaven's blessing once in that hellcare shithole.*
